

# Introducing the all new 2008 WIGGINS **YARD BULL** LoPRO™

Wiggins introduces the New 2008 Yard Bull™ LoPRO™, designed with innovative features to keep your operation running smoothly and efficiently. This lift keeps operating costs low with greater reliability and comfort than ever before.

## The 2007 Yard Bull™ LoPRO™ gets the job done like nothing else.

**Handling and Performance:** With the lowest center of gravity and highest tip factor in the industry, Wiggins has set a new standard for safety and handling.

**Operator Comfort:** A dramatically lower operator console and an AirRide seat significantly improves operator convenience and comfort.

**Easy Service Access:** The innovative tilt-cab design of the operator console and engine compartment allows easy access at eye level to the entire power train when servicing is needed.

**Enhanced Visibility:** With the lowest counter-weight in the industry, rearward visibility is dramatically improved increasing employee safety while protecting other property from damage.

**Wiggins Information Center:** The new state of the art IQAN™ System with its adjustable monitor keeps the operator informed about engine performance and status.

## Reliable. Efficient. Long-Lasting.

*The all new Wiggins 2008 Yard Bull™ LoPRO™ keeps you operating, and saves time and money with new state-of-the-art systems (patents pending).*

**Auto Lube\*** minimizes downtime by automatically lubricating key components – mast and carriage bearings, tilt cylinders and steer axle – ensuring smooth operation while saving money.

**On Demand Hydraulics** incorporates a closed center, load sensing and pressure compensating system that reduces fuel consumption and engine wear, saving money.

**Tier III Engine Options:** Cat, Cummins, Perkins, and GMC.

**Oil Purification System\*** reduces costly and time consuming oil changes. With proper maintenance the Yard Bull™ LoPRO™ can operate as long as one year without changing the oil.

*\*Available as options*

Wiggins knows your work environment can be tough on equipment. That's why the Yard Bull™ LoPRO™ is built using the latest materials to keep your lift running while extending the life of the equipment.

- Stainless steel coated steer column and steer motor.
- Stainless steel components used in critical areas to prevent corrosion.
- Zinc-based coatings prevent rust and corrosion on the mast and chassis.
- Improved design of switches and indicators.

Owning the 2008 Yard Bull™ LoPRO™ can save you money with reduced operating costs! That's one of the many reasons why Wiggins is a leader in the material handling equipment industry.

### Easy Access Design

Allows easy access at eye level to the entire power train when servicing is needed.

### Auto Lube System

Automatically lubricates key components – mast and carriage bearings, tilt cylinders and steer axle – ensuring smooth operation while saving money.
